Education

Indian Institute of Information Technology, Ranchi 2022 – 2026
B.Tech in Computer Science and Engineering *CGPA: 7.83*

Army Public School, Prayagraj
CBSE Board *Class XII: 93% | Class X: 93.8%*

Experience

Bigintsolutions May 2026 – Present
Software Developer 1 *Remote*

- Rebuilt **learn.approachable.dev** from scratch off a bare landing page (new dashboard, video player, progress-tracking) and built **approachable.dev**, the company's marketing site — generated the **first corporate lead within 3 days** of launch.
- Integrated **Razorpay and Cashfree** across iOS/Android (every major Razorpay method except Apple Pay) with IP-based SDK rendering and DB-level payment security; processed **Rs.2L+ revenue, 34 payments** in month 1, zero errors.
- Automated a **Razorpay → Zoho Books invoice-creation workflow** that raises a customer invoice on every successful payment, removing manual invoicing from the finance loop.
- Shipped **3 frontend features** for the Haziram production app (**4,000+ workers, 200+ companies**) plus 1 admin-app feature.
- Owned **Datadog-based monitoring/debugging** across services — diagnosed and documented issues including duplicate profile creation and a Heroku 30s response timeout.
- Built a **chat-based video editor** that cut internal video-editing time from **6–8 hours to 2–3 hours**.
- Delivered **600+ commits** across 3 projects built from scratch and 1 existing, in a **6-person team**.

NexisparkX Technologies April 2026 – May 2026
MERN Stack Intern *Remote*

- Migrated an existing production project's database from **Supabase to MongoDB** with zero data loss, and built an **admin dashboard** for NX Solution's Smart Ecosystem platform using the MERN stack.

Reelife Private Limited June 2025 – August 2025
Full Stack Developer Intern *Remote*

- Delivered **10+ production-ready React components** and **Node.js/Express REST API routes** for an internal e-commerce platform, debugging failures via Postman to improve reliability.

Technical Skills

Languages: JavaScript, TypeScript, C++, Python, SQL
Core Stack: React.js, Next.js, Node.js, Express.js, REST APIs
Backend & Systems: Microservices, API Gateway, JWT Authentication, Socket.io, BullMQ, Zod, Clerk Auth
Databases: PostgreSQL, MongoDB, MySQL, Supabase, Mongoose, Sequelize ORM
Payments, Infra & Monitoring: Razorpay, Cashfree, Zoho Books, Datadog, n8n, Resend, Vercel Blob
AI/LLM (Anthropic API Certified): Tool Use, RAG, Model Context Protocol (MCP), Prompt Caching, Agent Workflows, Claude Code
Frontend & UI: Tailwind CSS, Shadcn UI, Zustand, HTML/CSS, Figma
Tools & Platforms: Docker, AWS EC2, Git, GitHub, Postman, Vercel, VS Code
Core Subjects: Operating Systems, DBMS, Computer Networks, OOP

Projects

AlgoNote – AI DSA Revision Platform | GitHub | Live
React, Node.js, Express, PostgreSQL, MongoDB, Docker, AWS EC2, Clerk, OpenRouter

- Architected a **microservices backend across 3 services** with an API Gateway on **6-service Docker Compose** (AWS EC2), exposing **33 REST endpoints**; built a **YouTube-to-revision-sheet pipeline** and **LeetCode one-click import** into a Monaco-based editor.

Veda AI – AI Question Paper Generator | GitHub | Live
Next.js, Node.js, Express, MongoDB, BullMQ, Redis, Socket.io, Clerk, OpenRouter

- Built a **full-stack AI exam-paper generator** where teachers configure question types/marks/difficulty, triggering an LLM pipeline (OpenRouter, GPT-4o-mini) to produce structured, syllabus-aligned papers.
- Architected an **async job queue** (BullMQ, Redis) with a background worker, streaming real-time progress (queued → processing → completed/failed) to the client via **Socket.io**.

Achievements

Competitive Programming: LeetCode — 500+ problems | **1799 rating (Top 10% globally)** | 50+ contests | 93-day POTD streak | Profile
Leadership: Captained Basketball Team in Inter-IIIT tournaments (**3rd & 4th year**) | Vice Head of Gaming Society — **3+ events**, 100+ participants
